Assignment 8 Report

Tools used

Sublime Text 2 + Emmet Plugin ,
Google Chrome,
Bootstrap

Assets used

PHP tutorials online
Assignment 8 starter code, provided by course leader
Google font “Lato”

Description

The most challenging part of this ongoing project is not so much implementing the logic of the server-side code or database queries. Rather, the complexity arises from calling portions of the code in the wrong order or not performing necessary error checking.

The website is functional as per the requirements, but begs for an enhancement of the front-end side, which will be included with the final release.
